

CYTK450 TrueTouch® Evaluation Kit

Last Updated:
Mar 01, 2018

This kit is obsolete. See our TrueTouch page for current solutions.

The CYTK450 TrueTouch® Evaluation Kit (EVK) is based on the latest generation CYTT21XXX and CYTT31XXX family of capacitive Multi-Touch All-Points touchscreen controllers. This solution is able to support ten-finger tracking on ultra-thin touchscreen stack-ups up to 7" and delivers unmatched performance in the presence of noise. This family features best-in-class charger noise immunity, highest SNR in the presence of noise, glove support, 2.5-mm passive stylus support and the industry's best waterproofing. The CYTK450 EVK is a powerful platform for demonstrating performance and includes all the hardware and software needed to configure, optimize, and test touchscreen solutions.

CYTK450 EVK Contents:

- TrueTouch® evaluation kit with 5.3” touch panel enclosed in plastic casing
- 2.5 mm passive stylus
- Micro-USB cable
- USB drive with documentation, TrueTouch® Host Emulator, and design files
