

Neo™

POWERED BY AERIS

THE FIRST ONLINE MARKETPLACE FOR SIMS & CELLULAR CONNECTIVITY

QUICKLY DEPLOY YOUR M2M SOLUTION

NO VOLUME COMMITMENT

Start out with as few as 10 SIMs to grow your business on your own terms. Plus you're not locked into a long-term commitment as with carriers and MVNOs.

SMS SERVICES

Neo SIMs do more than just transmit data — they also allow you to send and receive SMS messages, opening up entirely new lines of communication for your business.

EXPANDED COVERAGE

Our network offers a combination of GPRS, Edge, and UMTS services to provide extensive GSM coverage that reaches over 200 million people and even more machines.

REMOTE SIM MANAGEMENT

With Neo's self-service SIM management platform, you can monitor and troubleshoot your devices, ensuring that any issues are addressed quickly.

THE FAST LANE TO IOT

Neo is the first online marketplace for the sale of SIMs and connectivity for M2M / IoT devices. Neo was designed with simplicity in mind, providing you with all of the tools you need to deploy your solutions quicker and more effectively than ever before.

LOWER YOUR IOT TCO

Pay only for what you use. No volume commitments or minimum term. No hidden fees or confusing overage charges. In addition, Neo's powerful connectivity management platform—AerPort™—gives you real-time visibility and control of your deployment, thereby enabling you to avoid unexpected charges.

GET CONNECTED FASTER

Connect your devices in a matter of days, not weeks or months. With Neo, there's no lengthy negotiation with a cellular data provider. Simply create your free account and order your SIMs online, which can be delivered in as little as 24 hours.

LAUNCH YOUR SOLUTION QUICKLY

Reduce the turnaround time of your organization's cellular deployment and product release cycles. Neo includes all the tools and guidance you need to quickly set up, manage, and deploy your connected solution. Neo's process is designed to be both intuitive and easy to use, with documentation dedicated to guiding you through and simplifying your development. In a handful of steps and only a matter of days, you can get your product activated and sending data.

SELF-SERVICE CONNECTIVITY IN 3 EASY STEPS

A FULL SET OF IOT FEATURES

Neo includes a full complement of features including a comprehensive coverage footprint, online management portal, alerts, a highly secure VPN, and APIs.

Comprehensive Coverage Footprint — Our network offers a combination of GPRS, Edge, and UMTS services to provide extensive GSM coverage that reaches over 200 million people and many more machines in the United States.

Online Management Portal — With AerPort, our online SIM management portal, you can monitor and troubleshoot your devices to ensure any issues are addressed quickly. You can also control the status of your SIM cards, so your devices only use the data you require.

MyAlerts — Our notification service lets you define when and why you receive alerts. Whether for one or multiple devices, setting up these alerts takes just a few clicks in AerPort.

VPN/Private Link — Neo offers complete encryption of the communication between your devices and your corporate network, while reducing the need for an application-layer level of encryption. In some situations, your M2M / IoT solutions can also be set up as an extension of your private corporate network. With this option enabled, wireless devices on our Private Link can use the same private address space as your corporate network.

APIs — Neo is built on a platform of application program interfaces (APIs) that provide users with top-tier connectivity for M2M / IoT solutions. Our APIs give you the power to automate sophisticated, time-consuming network operations, as well as perform big data analytics in near real-time.

UNMATCHED IOT SUPPORT

Our resource center includes everything you need to launch and manage your Neo SIMs. Whether you're looking for tutorials for specific tasks, reference materials that dive into our API details, or help from our online support community, you've come to the right place.

When you use Neo and our self-service SIM management platform, you'll notice the results right away. With the best tools on the best network, Neo is the number one option for your organization to connect your devices with the M2M / IoT cloud.

ABOUT NEO & AERIS

Neo enables any company to easily develop, launch, and manage innovative M2M and IoT solutions that require cellular connectivity while dramatically reducing the time, cost, and hassle of obtaining and operating connectivity through traditional channels. Neo is powered by Aeris.
